PROFILE SUMMARY

Senior Java Developer with 8+ years of experience architecting and delivering scalable backend and full-stack solutions for enterprise and eCommerce platforms. Deep expertise in Java, Spring Boot, and microservices architecture, combined with strong hands-on experience building responsive front-ends in React and deploying cloud-native solutions on AWS. Proven track record leading Python-to-Java microservice migrations, designing secure cloud file-handling systems (AWS S3, Pre-Signed URLs), and implementing event-driven architectures with Kafka. Adept at driving code quality through reviews, unit/integration testing, and clean architecture principles within Agile/Scrum teams.

CORE TECHNICAL SKILLS

Languages	Java 21, JavaScript, SQL, Python
Backend / Frameworks	Spring Boot, Spring MVC, Hibernate, REST APIs, Microservices, Kafka
Frontend	React 18, HTML5, CSS3, Axios
Cloud / DevOps	AWS (S3, Pre-Signed URLs), Docker, Git, CI/CD
Databases	PostgreSQL, MySQL, SQL Server, MongoDB
Tools	IntelliJ IDEA, Eclipse, Postman, Claude Code, GitHub Copilot
Practices	Agile/Scrum, Code Reviews, Unit & Integration Testing, Clean Architecture

PROFESSIONAL EXPERIENCE

Senior Software Engineer | *LTIMindtree* — *Jul 2023 – Present*

- Developed a communication platform service in Java/Spring Boot enabling users to create and customize email templates, improving campaign turnaround time.
- Led the migration of multiple Python REST APIs to Spring Boot microservices, ensuring feature parity while improving scalability and maintainability.
- Designed secure cloud file upload/download capabilities using AWS S3 with Pre-Signed URLs for time-limited, secure attachment access.
- Implemented Kafka-based real-time data streaming and messaging to enable reliable, decoupled communication across microservices.
- Optimized PostgreSQL databases by writing complex queries and enforcing data integrity across distributed services.
- Built and integrated React UI components with Spring Boot backend APIs to deliver dynamic, data-driven user experiences.
- Leveraged GitHub Copilot in the current project to accelerate code development, REST API implementation, unit test case generation, code optimization, and debugging.
- Used GitHub Copilot to improve development productivity by generating code suggestions, refactoring existing code, and identifying potential improvements in implementation and test coverage.
- Drove engineering quality through code reviews, clean architecture enforcement, and unit/integration testing.
- Partnered with QA, DevOps, and Product teams in an Agile/Scrum environment, contributing to sprint planning and backlog grooming.

System Engineer (Java Developer) | *Tata Consultancy Services (TCS)* — *Jul 2018 – Jul 2023*

- Developed and maintained a Java/Spring Boot eCommerce application, handling defect resolution and new feature delivery.
- Built and tested RESTful APIs using Spring Boot and Postman, integrating with SQL Server and MySQL via Hibernate.
- Developed reusable React UI components based on visual designs, using Axios with Bearer token authentication for API integration.
- Designed and deployed chatbots using AVAAMO and JavaScript to enhance customer engagement on the eCommerce platform.
- Delivered features on schedule following Agile/Scrum methodologies in a cross-functional team environment.

EDUCATION

B.Tech / B.E. — Computer Science and Engineering (CSE)
SGGS College of Engineering & Technology, Nanded | 2018

CERTIFICATION

- GenAI & AI Agents for Java Spring Boot Devs | Copilot,Claude
- Microsoft GitHub Foundations
