AYUSH TAMRAKAR

Java Backend / Microservices Engineer

Email: ayushtamrakarworks@gmail.com | **Phone:** 9630653760 | **LinkedIn:** ayush-tamrakar-413346202 | **GitHub:** Ayush22799

PROFESSIONAL SUMMARY

Java Backend Engineer with 5 years of experience developing scalable microservices and payment systems using Java, Spring Boot, REST/SOAP APIs, Oracle, and cloud platforms. Experienced in high-volume transaction processing, secure payment integrations, production support, database optimization, cloud migration, and CI/CD. Delivered Mastercard-compliant payment enhancements and improved Oracle query performance by up to 25%.

TECHNICAL SKILLS

Languages: Java 8+, SQL, PL/SQL
Core Java: Collections Framework, Multithreading, Concurrency, Streams API, Lambda, OOPS, SOLID Principles
Backend: Spring Boot, Spring MVC, Spring Security, Microservices Architecture, REST APIs, SOAP Web Services, JPA, Hibernate
Database: Oracle (Partitioning, Query Optimization), PostgreSQL
Cloud & DevOps: AWS (EC2, S3, IAM), GCP (Compute Engine, Cloud Storage), Jenkins, CI/CD
Testing & Tools: JUnit, Mockito, Karate, Git, Maven, JIRA, SonarQube
Frontend: React.js, react-flow
Domain: Payment Gateway Systems, Core Banking, Cloud/Data Platforms

PROFESSIONAL EXPERIENCE

IBM India Pvt Ltd | *Cloud Fullstack Developer (Backend Focused)* Oct 2024 - Present

Client: *Barclays - Payment Gateway Services*

- Owned end-to-end implementation of Mastercard-compliant Transaction Identifier for EMI-based recurring transactions, leading design, development, testing, and production delivery.
- Designed and developed Java-based microservices supporting high-volume card and non-card transactions.
- Built secure REST and SOAP APIs for authentication, authorization, and settlement flows.
- Implemented Privacy by Design controls for sensitive PII “toxic combination” fields by introducing application-level encryption before database persistence, preventing sensitive data from being stored in plaintext.
- Enhanced PAS2, a microservice-based 3DS authentication application, by implementing data masking for sensitive data at rest and encryption controls for retrieved data.
- Implemented Mastercard-mandated enhancements ensuring regulatory compliance with zero production downtime.
- Led Oracle database partitioning and automated archival of 12-18 months of data, improving query performance by up to 25%.
- Resolved 30+ P1/P2 production issues related to transaction failures and API integrations, prioritizing critical fixes for production delivery.
- Migrated the test automation suite from the legacy DIT environment to the SRA AWS-based server, enabling automated test execution on the cloud platform.
- Managed build, release, and Jenkins-based CI/CD deployment activities.

Accenture Pvt Ltd | *Custom Software Engineering Analyst* Feb 2022 - Oct 2024

Client: *American Express - Next-Gen Big Data Platform & Cloud Migration*

- Developed Java/Spring Boot backend services and RESTful CRUD APIs for a GCP-based data platform, implementing business logic and integrating multiple GCP APIs.
- Contributed to a cloud-native ETL/data transformation platform using GCP services, including BigQuery, with microservices-based architecture.
- Developed and maintained automated Java/Karate functional, regression, and load-testing suites, achieving 95%+ JUnit test coverage and supporting code quality through SonarQube.
- Built API integrations and resolved defects/performance issues during cloud migration, improving reliability of data-platform workflows.
- Contributed as a frontend developer to the Data Transformation UI using React.js and react-flow, integrating backend APIs, managing complex application state, and building reusable UI components.
- Delivered critical UI fixes and features that improved user productivity by 30–40% across data-transformation workflows.

CERTIFICATIONS

- Google Cloud - Associate Cloud Engineer
- AWS Cloud Practitioner
- AWS AI Practitioner

Bachelor of Technology (CSE) - Lakshmi Narayan College of Technology, Indore 2017 - 2021
