HARISH CHANDRAKANT RUKUMPURE

Backend Full Stack Developer (Java) — 7+ Years Experience

Gopal Patti, Manjri Bk, Pune, Maharashtra 412307 | Harish.Rukumpure@gmail.com | +91 8668933454

PROFESSIONAL SUMMARY

Backend Full Stack Developer with 7+ years of experience across the Java/Spring Boot ecosystem, building REST APIs, event-driven services with Kafka, and React JS front ends for financial-services platforms. Growing expertise integrating Agentic AI tools (Claude Code, GitHub Copilot, ChatGPT, prompt engineering) into the SDLC to accelerate code generation, debugging, test automation, and code review. Seeking a role that combines hands-on backend ownership with continued growth in AI-assisted software development.

TECHNICAL SKILLS

Languages: Java 8/21, SQL, Python

Frameworks: Spring, Spring Boot, Hibernate/JPA, Microservices, REST API, JBPM

Messaging & Data: Kafka, MongoDB, Oracle 11g

Frontend: React JS

DevOps & Tools: Docker, Kubernetes, Jenkins, Tomcat

AI/Agentic Tools: Claude Code, GitHub Copilot, ChatGPT, Cursor, Prompt Engineering, AI-assisted Code Review & Test Automation

PROFESSIONAL EXPERIENCE

Fiserv, Pune (Payroll: Mphasis) **Feb 2026 – Present**

Backend Full Stack Developer (Individual Contributor) — Dispute Process Automation (DPS)

Individual contributor on DPS, an automated dispute management platform for credit card transactions, extending customer dispute eligibility from a 2-billing-cycle window to 2 years via a new "Time Travel" capability.

- Independently designed and built the "Time Travel" module to fetch, reconstruct, and validate historical transaction and billing-cycle data up to 2 years back, enabling dispute eligibility beyond the standard 2-cycle limit.
- Developed React JS components allowing customers/analysts to search and select older transactions and initiate disputes against them.
- Built REST APIs in Java 8/21 and Spring Boot for historical transaction lookup, dispute eligibility validation, and dispute case creation against archived records.
- Designed logic to traverse and reconcile multiple past billing cycles' archived/partitioned datasets, validating transactions against dispute-window and reason-code rules.
- Used Kafka for asynchronous retrieval/processing of historical data and to publish dispute-status events to downstream systems without blocking real-time dispute intake.
- Used AI coding agents to accelerate boilerplate generation (REST APIs, DAO/service layers), speed up root-cause debugging, auto-generate unit/integration test cases, and catch defects in AI-assisted code review before QA handoff.

HSBC Software Development (India), Pune (Payroll: LTM) **Mar 2022 – Feb 2026**

Backend Full Stack Developer (Individual Contributor) — Client Lifecycle Hub (CLUB), May 2023 – Feb 2026

Built a single platform for fund and non-fund onboarding, integrating with 11 internal systems to improve onboarding turnaround time and reduce manual input; helped retire legacy TCS/GFD, CLMTV1, and CLMT Lite applications, cutting annual cost by an estimated $500K/$365K and server & license cost by $255K.

- Owned backend features end-to-end as an individual contributor, from requirements clarification with product managers through sprint planning, implementation, and delivery.
- Designed and developed server-side logic, APIs, and services using Java 8/21, Spring, Spring Boot, Hibernate, and Kafka.
- Collaborated with designers on implementation feasibility and with QA engineers on test strategy; implemented automated unit, integration, and e2e tests.
- Participated in technical design discussions and maintained ownership of assigned modules through their lifecycle.

Tech Mahindra, Pune **May 2019 – Mar 2022**

Software Developer — PACS Automation (British Telecom)

- Designed and developed server-side logic, APIs, and services using Java 8, Spring, and Spring Boot RESTful web services.
- Built scalable, secure, and maintainable backend systems on Oracle 11g, Tomcat, and JBPM.
- Wrote clean, maintainable, well-documented code and implemented automated unit, integration, and e2e tests.

EDUCATION

Bachelor of Engineering

Savitribai Phule Pune University — PVG's College of Engineering and Technology, Pune, India | Jun 2013 – May 2016

LANGUAGES

English (Proficient) — Speaking, Writing | Marathi (Native) | Hindi (Native)
