Khyati Priya

Technical Lead | Java, Spring Boot & Microservices | Banking & Insurance Domain

+91-9039781934 | khyatipr96@gmail.com | linkedin.com/in/khyati-priya-241b0124b | Pune

Professional Summary

Results-driven **Technical Lead** and **IT Consultant** with **8+ years** of end-to-end experience **architecting, delivering, and consulting** on enterprise-grade **Java Microservices** platforms across **Banking, Insurance, and Fintech** domains. Spearheaded mission-critical programs for **Tier-1 global institutions** — Barclays (UK), Lloyds Banking Group (UK), Western Union, MUTB (Japan), and New York Life Insurance (USA) — **spanning onsite client engagement, regulatory consulting, and hands-on product engineering.**

Engineered **30+ Open Banking APIs** on **IBM API Connect** for Lloyds Banking Group serving **billions of API calls daily**; executed a **zero-downtime Oracle Flex cube v12 → v14** core banking upgrade for Japan's MUTB with **25% improvement in query performance**; and configured **AML/KYC compliance frameworks across 40+ countries** for Western Union. Brings a rare blend of **deep technical consulting**, **onsite client interaction**, and **product-level ownership** — translating regulatory and business requirements directly into scalable, production-grade systems.

Adept at **engaging with clients and cross-geography stakeholders** with clarity and conviction. Proven **IT consultant** who bridges the gap between business strategy and engineering execution — owning **requirement discovery, solution design, and end-to-end delivery**. Leads with **analytical thinking**, **ownership mindset**, and **structured problem-solving** — mentoring engineers, governing **code quality**, championing **Agile best practices**, and consistently delivering within demanding timelines across multi-geography programs.

Core Technical Skills

Languages & Frameworks: **Java 8 / 11 / 17** (Streams, Lambda, Optional, Parallel Processing), **Spring Boot**, Spring MVC, **Spring Security**, Spring Cloud, Spring Data, **Hibernate / JPA**, J2EE, React

Architecture & Design: **Microservices Architecture**, REST API Design, **Domain-Driven Design (DDD)**, Design Patterns (SOLID, GoF), **Algorithms & Data Structures**, OOP, Event-Driven Architecture

Messaging & Streaming: **Apache Kafka** (Producer/Consumer, Topics, Partitions enterprise-scale), IBM MQ

Cloud & DevOps: **AWS** (EC2, S3, Lambda, API Gateway, SQS), **Docker**, **Kubernetes**, OpenShift, **Jenkins (CI/CD)**, Maven, Git, GitHub, TFS, Artifactory

API Management: **IBM API Connect (APIC)**, DataPower API Gateway, Swagger / Open API, OAuth 2.0, Okta

Databases: **Oracle Database**, MySQL, PostgreSQL, PL/SQL, **Oracle Flex cube** (Core Banking v12–v14), ELK Stack (Kibana, log analysis)

Tools & Platforms: IntelliJ IDEA, Eclipse, VS Code, JUnit, Mockito, Postman, WinSCP, Putty

Soft Skills: **Stakeholder Management**, **Client Communication**, **Team Leadership & Mentoring**, **Analytical Thinking**, **Problem Solving**, Agile Delivery, Cross-functional Collaboration, Ownership Mindset

Domains: **Banking (Retail, Corporate)**, Insurance, **Fintech**, **AML/KYC Compliance**, **Open Banking (PSD2)**, Core Banking Modernization

Work Experience

HCLTech | Technical Lead

May 2025 – Present | Pune

Client: *Western Union | Project: Risk & Compliance AML/KYC Platform Modernization*

- **Spearheaded** AML/KYC compliance configuration across **40+ countries**, enabling regulatory readiness for Western Union's global money-transfer platform processing **millions of transactions daily** — acting as primary technical consultant between engineering and compliance leadership.
- **Engineered** country-specific compliance rule mappings into UI data-capture fields and Oracle database templates, ensuring **100% audit-ready data integrity** across all regional deployments.

- **Executed** zero-downtime environment migration from **JBoss 7.4 to JBoss EAP 8** — reconfiguring data sources, deployment descriptors, and security modules with no production impact.
- **Consulted** directly with Western Union's product, compliance, and legal leadership across geographies, translating regulatory mandates into sprint-ready engineering tasks — demonstrating **onsite consulting acumen** and executive stakeholder communication.
- **Governed** code quality through structured reviews for junior engineers, enforcing engineering standards and **Agile/Scrum** delivery discipline across all sprint cycles.

Fujitsu | Application Developer

Dec 2023 – Apr 2025 | Pune

Client: *MUTB Mitsubishi UFJ Trust & Banking Corporation, Japan | Project: Oracle Flex cube Core Banking Upgrade (v12 → v14)*

- **Delivered** end-to-end **Oracle Flex cube v12 → v14** upgrade for MUTB — one of Japan's largest financial institutions — achieving **zero critical production downtime** and serving as the sole technical lead for the entire migration lifecycle.
- **Accelerated** system performance by **~25%** through independent execution of a large-scale **PL/SQL-to-Java Spring Boot** migration, re-engineering 100+ legacy stored procedures into maintainable microservices.
- **Eliminated 40+ critical upgrade defects** across banking operations, QA, and infrastructure teams through disciplined root cause analysis and cross-functional coordination.
- **Owned** product delivery end-to-end — from design and build through regression testing to production sign-off — demonstrating full **product engineering ownership** on a mission-critical banking platform.

IBM India | Senior System Engineer

Mar 2023 – Dec 2023 | Pune

Client: *Lloyds Banking Group, UK | Project: Open Banking API Implementation (PSD2 / UK Open Banking Standard)*

- **Built** and deployed **30+ production-grade RESTful APIs** on **IBM API Connect (APIC)** for Lloyds Banking Group's UK Open Banking program, handling **billions of API calls daily** with 99.9%+ availability.
- **Designed** a decoupled **API proxy and gateway architecture** using APIC and DataPower, insulating 10+ backend enterprise services from external consumers and enabling governed, secure Open Banking access.
- **Resolved** L3 production incidents with **SLA-compliant turnaround**, performing root cause analysis and performance monitoring for high-availability financial services infrastructure.
- **Partnered** with Lloyds' cloud architecture and compliance teams to enforce **PSD2 standards, OAuth 2.0 / JWT security policies**, and API SLA adherence — functioning as a **technical consultant** bridging IBM engineering and Lloyd's product ownership.

Client: *Barclays, UK | Project: UKC Desktop Replacement Customer Care Platform* *Jun 2021 – Feb 2023 | Pune*

- **Architected** and shipped a unified customer care platform consolidating **10+ internal Barclays applications** — eliminating context-switching for 1,000+ customer care agents and driving measurable reduction in average handling time.
- **Scaled** the backend by building **15+ RESTful microservices** in **Java Spring Boot**, Spring Cloud, and Hibernate/JPA — containerized with Docker and deployed on OpenShift via Jenkins CI/CD pipelines.
- **Hardened** security posture by implementing **Spring Security with Okta** for enterprise-grade authentication across all microservice endpoints, meeting Barclays' financial services compliance requirements.
- **Actively** contributed to sprint planning, daily standups, and retrospectives within a 5-member team across 4 release cycles, ensuring timely delivery and adherence to quality standards.
- Mentored 2 junior engineers on microservices design patterns and Spring Boot, contributing to improved code quality and higher first-pass review acceptance within 3 months.

Atos Syntel | Associate Consultant

Feb 2018 – Jun 2021 | Pune

Client: *New York Life Insurance, USA | Project: Print Policy Modernization Enhancement*

- **Designed** and developed a Java-based batch processing system to ingest flat files from multiple upstream Life & Annuity systems and transform policy data into structured XML for downstream PDF/AFP document generation.
- **Contributed** to requirement analysis and effort estimation, supporting accurate sprint planning and timely delivery of features.
- **Enhanced** existing application functionality by implementing new features and performing comprehensive feature and regression testing to ensure system stability and quality.

Certifications

AWS Certified Cloud Practitioner *Amazon Web Services | 2022-2025*

Education

- **Bachelor of Engineering (Computer Science & Engineering)** *2013 – 2017*
  Lakshmi Narain College of Technology, Indore | CGPA/Percentage: 75.2%
