Mohammad Zakhi Khan

Senior Software Engineer

zakykhan47@gmail.com | 7600421907 | Ahmedabad, India | linkedin.com/in/zaky-khan-

Senior Software Engineer with 6 years of experience in Java, Spring Boot, Microservices, and REST API development across banking, fintech, and e-commerce domains. Experienced in building and supporting scalable applications using Kong API Gateway, Docker, Kafka, MySQL, MongoDB, and cloud technologies. Worked on Shopify-based e-commerce applications and integrated payment gateways for secure and reliable payment processing. Strong experience in full-stack development, API integration, production support, and delivering scalable and maintainable enterprise applications.

SKILLS

Programming Languages: Java, React, JavaScript, HTML

Frameworks & Libraries: Spring Boot, Spring Data, Custom Framework, Hibernate

Data & Storage: MySQL, MongoDB, Postgres

Cloud & DevOps: AWS, Kubernetes, Docker, CI/CD, Application Deployment

Microservices & APIs: Microservices, Rest APIs, Gateway Integration, Kong

Build/Package Tools: Maven

Messaging/Streaming: Kafka

Reporting/Analytics: Jasper Reports

Others: DSA (Data Structures and Algorithms; foundational computer science knowledge)

Infrastructure & Networking: Networking Fundamentals, Basic Linux Administration, Server Setup, API Gateway Deployment

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER Jun 2025 – Present

Certify Technologies Porur Gardens, Chennai

LBB Mobile Banking: Designed, deployed, and managed the Kong Community Edition API gateway across QA, SIT, UAT, and Production environments using Docker-based, containerized infrastructure.

- Implemented custom configurations for advanced traffic management, security, and scalability in each environment. Led the integration of essential plugins, defined and maintained services and routes through declarative configuration, and ensured robust, secure, and efficient API traffic flow. Validated gateway performance, optimized plugin usage, and maintained operational excellence to support seamless application development, comprehensive testing, and reliable production deployment.
- Implemented and configured Kong Gateway (latest version) with Konga to support multi-consumer API requests, including API routing, consumer management, authentication, and centralized API administration.
- Delivered Level 1/Level 2 production support for post-go-live banking applications, performing issue analysis, root cause identification, and timely resolution of production incidents.

Software Engineer Mar 2022 – Jun 2025

Manektech Pvt Ltd Ahmedabad, India

Developed full-stack digital banking applications using Java, Spring Boot/MVC, MySQL, JSP, Thymeleaf, HTML, and JavaScript. Built and integrated REST APIs for banking services, implemented Kong API Gateway with Konga for secure API management, and optimized SQL queries and RBAC. Performed API testing with Postman, managed code using GitLab and JIRA, and provided post-go-live production support through troubleshooting, log analysis, and root cause analysis.

- LBB: - Key contributions included integrating core banking systems via REST APIs, generating transaction vouchers using Jasper Reports, and handling KYC and SMS notifications through third-party services.
- I also provided onsite client support in Laos as a key team member during deployment and issue resolution.
- Deem 2.0: - Served as a Full Stack Developer for a comprehensive digital banking platform catering to staff and customers. Built backend services and frontend screens using Java, Spring, MySQL, and Thymeleaf. Implemented Card and Loan Booking APIs in LOS, built an Email Notification service, and created features for Liability and Clearance letters. Additionally, I worked on role-based access, SQL optimization, and UI improvements based on client feedback. Worked on Tools included Postman, GitLab, and JIRA for testing, collaboration, and issue tracking.

SOFTWARE ENGINEER Jan 2021 – Mar 2022

Lucent Innovations Pvt Lts Ahmedabad, India

Worked on PayU Refund App and Raintree Nursery, developing backend services using Java, Spring Boot, MySQL, and Kafka with event-driven architecture. Built and integrated REST APIs, implemented CRUD operations for instant COD refund processing through PayOut wallet integration, and resolved critical bugs and performance bottlenecks. Contributed to the React frontend, integrated Shopify, USPS, UPS, and FedEx APIs, and automated order fulfillment, shipping label generation, and delivery workflows to ensure scalable, asynchronous, and reliable processing.

EDUCATION

Gujarat Technological University July 2016 – July 2021

MASTER'S (MCA) in COMPUTER SCIENCE, GPA: 8.9

PROJECTS

LBB BANKING SOFTWARE

IMPLEMENTED FOR LBB BANK IN LAOS, INTEGRATING KONG API GATEWAY FOR MOBILE BANKING TRANSACTIONS WITH A MULTI-INSTANCE GATEWAY ARCHITECTURE.

Deem 2.0

DEEM BANKING SOFTAWRE IMPLEMENTED FOR BANK IN DUBAI.

Toki App

TOKI APP IS AN INTEGRATED DIGITAL PLATFORM COMBINING WHATSAPP-LIKE COMMUNICATION, E-COMMERCE SHOPPING, AND SECURE PAYMENT GATEWAY SERVICES IN A SINGLE APPLICATION.

PayU Refund App

A REFUND APP BUILD IN SHOPIFY PLATFORM FOR A MERCHANT.

Raintree Nursery

SHOPPING APP BUILDS IN SHOPIFY THAT SELLS PLANTS AND FLOWERS.
