PRADIP CHAVAN

Senior Java Full Stack Developer

Java | Spring Boot | Microservices | React.js | Spring Security | AWS | Kafka | Docker | Kubernetes

chavanpradip82@gmail.com | +91-9552277959 | Pune, Maharashtra | LinkedIn: linkedin.com/in/pradip-chavan-95323b168/

PROFESSIONAL SUMMARY

Senior Java Full Stack Developer with 8+ years of experience in analysis, design, development, testing and deployment of enterprise applications. Hands-on experience with Java 8, Spring, Spring Boot, Spring Security, REST APIs, Microservices, React.js, JPA, Oracle, MySQL, MongoDB, Apache Kafka and AWS. Experienced in banking and e-commerce domains, Agile/Scrum delivery, CI/CD with Jenkins, Docker, SonarQube, and production support. Experienced in AI-assisted development using Microsoft Copilot and Amazon Q.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Backend: Spring, Spring Boot, Spring MVC, Spring Data JPA, RESTful Services, Microservices

Security: Spring Security, OAuth2, JWT, Authentication & Authorization

Frontend: React.js, jQuery, Bootstrap, Node js, Express Js

Databases: Oracle, MySQL, MongoDB

Messaging / Caching: Apache Kafka, Redis

Cloud / DevOps: AWS EC2, S3, RDS, IAM, Lambda, EKS, Jenkins, Docker, Kubernetes

Tools: Maven, GitHub, Bitbucket, JIRA, SonarQube, EFK

Practices: Agile/Scrum, REST API Integration, Unit/Integration Testing, Code Review, CI/CD

PROFESSIONAL EXPERIENCE

Newgen Software Pvt. Ltd. — Sr. Software Engineer | June 2023 – Present

- Design and Develop and maintain Java/Spring Boot and React.js applications for enterprise banking workflows.
- Design REST APIs, integrate microservices, implement business validations, and work with Oracle/JPA.
- Collaborate with architects, business analysts, frontend, QA and DevOps teams in Agile/Scrum delivery.
- Contribute to unit testing, code quality, CI/CD, Docker-based deployments and AWS environments.

Newgen Software Pvt. Ltd. — Software Engineer | March 2019 – June 2023

- Developed Java/Spring/Spring Boot web applications and RESTful services for banking projects.
- Built UI features using React.js/JavaScript and integrated them with backend APIs.
- Worked on database integration, testing, defect resolution, code reviews and SIT/UAT support.

CatsEye System and Solutions — Java Developer | April 2018 – March 2019

- Developed Java web applications using Spring MVC, JSP, REST/Web Services and relational databases.
- Implemented application features, validations, database integration and unit/integration testing.

PROJECT EXPERIENCE

Multi-Accounting Credit Card Onboarding – End-to-End Automation

Client: Axis Bank | **Domain**: Banking | **Role**: Senior Developer | **Team Size**: 5

Environment: React JS, Java, Spring Boot, Microservices, JPA, Oracle, Apache Kafka, AWS Cloud, REST APIs

- Banking onboarding solution that moved CTL eligibility checks to the Sourcing stage and identified existing cardholders upfront.
- Supported parallel eligibility/API checks for instant card creation, reducing documentation, turnaround time and underwriting effort.
- Worked across requirements, analysis, design and development in Scrum; collaborated with architects, BAs, frontend, QA and DevOps teams.
- Implemented backend services and REST API integrations; developed unit tests with JUnit/mocking and maintained code quality with SonarQube.
- Worked with AWS infrastructure, Jenkins CI/CD, Dockerfiles, monitoring and knowledge transfer.

Axis Bank Credit Card Application – Channel Partner Platform

Client: Axis Bank | **Domain**: Banking | **Role**: Senior Developer

Environment: React JS, Java, Spring, Spring Boot, Spring Security, Web Services, REST APIs, JPA, Oracle

- Web-based credit-card application platform for Axis Bank channel partners to digitally source customers and submit applications.
- Implemented customer details, OTP verification, employment/address information, KYC document upload, card selection, validations, application submission and status tracking.

- Developed responsive React.js UI and integrated it with Spring Boot REST APIs for data capture, validation and submission to backend systems.
- Implemented Spring Security for authentication/authorization and REST API security; supported unit/integration testing, SIT/UAT and defect resolution.
- Contributed to AWS infrastructure, Jenkins CI/CD, Docker and SonarQube activities.

Enterprise Credit Card BPM & Underwriting Platform

Client: Axis Bank | **Domain**: Banking | **Role**: Tech Member – Developer | **Team Size**: 6
Environment: React JS, Java, Spring Boot, Microservices, JPA, Oracle, Apache Kafka, AWS Cloud

- Enterprise BPM and underwriting platform supporting the credit-card lifecycle from application submission through fraud detection, credit bureau, KYC, document audit, field investigation, underwriting decisioning and card generation/dispatch.
- Participated in requirements, design and development and collaborated with architecture, BA, frontend, QA and DevOps teams.
- Developed and tested backend services, performed JUnit mocking, maintained code quality with SonarQube and supported AWS/Jenkins/Docker activities.

Credit Card Servicing Layer

Client: Axis Bank | **Domain**: Banking | **Role**: Tech Member – Developer | **Team Size**: 3
Environment: Java, Spring Boot, Microservices, Oracle

- Servicing layer for credit-card customer eligibility, integrating multiple third-party services for customer information and eligibility decisions.
- Worked on service integration, requirements, analysis, design, development, unit testing, code reviews and production monitoring/knowledge transfer.

Axis Bank Credit Card Web Application

Client: Axis Bank | **Domain**: Banking | **Role**: Tech Member – Developer | **Team Size**: 3
Environment: HTML, CSS, jQuery, Java, JSP, Spring, Spring Boot, JPA, Web Services, RESTful Services, Oracle

- Web-based credit-card application providing an end-to-end digital journey from basic details to card selection and application approval.
- Developed Java forms/classes, responsive web UI, MVC components, JDBC integration and Spring Controllers; implemented AJAX-based asynchronous requests.
- Performed unit/integration testing, code reviews and SIT/UAT defect resolution.

E-Commerce Application

Domain: E-Commerce | **Role**: Jr. Java Developer | **Team Size**: 5
Environment: JQuery, Java, JSP, Spring MVC, Web Services, RESTful Services, MySQL

- Developed and maintained functionality for Customer, product listing, details, search, filtering, cart, checkout and order tracking.
- Developed Java and Spring MVC components for implementing business requirements and application workflows.
- Implemented role-based access for Customer/Admin using Spring Security and integrated frontend with backend REST services.
- Performed unit/integration testing, code reviews and SIT/UAT defect resolution.

EDUCATION

B.E. – Computer Science & Engineering, BAMU, Aurangabad | 2012 – 2016

TARGET ROLE

Senior Java Full Stack Developer | Senior Java Developer | Java Spring Boot Developer | Java Microservices Developer | Java + React Full Stack Developer | Senior Full Stack Java Developer | Technical Lead
