Pratik Dilip Shinde

+91 985 000 5162 | pratikdilipshinde12@gmail.com | Pune, MH

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with **8+ years of experience** designing and delivering scalable enterprise applications using **Java, Spring Boot, React, TypeScript, AWS, and microservices**. Experienced in building distributed systems, REST APIs, event-driven architectures, cloud-native applications, and responsive web platforms. Strong end-to-end ownership across **system design, development, testing, CI/CD, deployment, and production support**. Experienced in leveraging **Generative AI, LLMs, RAG, and AI-assisted engineering** to accelerate development, automate repetitive workflows, improve code quality, and enable intelligent application capabilities.

TECHNICAL SKILLS

- **Programming:** Java 8–21, Python, SQL, JavaScript, TypeScript
- **Backend:** Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, REST APIs, Microservices, Kafka
- **Frontend:** React, Redux, React Hooks, TypeScript, HTML5, CSS3, Tailwind CSS
- **Cloud/DevOps:** AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Terraform
- **AWS:** EC2, S3, Lambda, API Gateway, RDS, ECS/EKS, SQS, SNS, CloudWatch, IAM
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB, Redis
- **AI/GenAI:** LLM APIs, RAG, Prompt Engineering, AI Agents, Intelligent Search, AI-assisted Development
- **Testing:** JUnit, Mockito, Jest, React Testing Library, Selenium, Postman
- **Engineering:** Microservices, Event-Driven Architecture, Distributed Systems, System Design, Design Patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

Wells Fargo – California, USA
Full Stack Software Engineer | Aug 2024 – Present

- Designed and delivered **8+ Java/Spring Boot microservices** supporting enterprise financial workflows and high-volume transaction processing.
- Developed and integrated **25+ REST APIs** using Spring Boot, JPA/Hibernate, and PostgreSQL for secure, scalable service communication.
- Built reusable **React/TypeScript** components across **15+ application screens**, improving frontend consistency and reducing duplicated UI development.
- Implemented **asynchronous and event-driven workflows** using AWS services and messaging technologies, improving processing resilience, and reducing synchronous service dependencies.
- Optimized API and database interactions, achieving approximately **20–25% improvement in response performance** across targeted workflows.
- Implemented **authentication, authorization, RBAC, validation, and centralized exception handling** across multiple enterprise services.
- Developed unit, integration, and API test suites using **JUnit, Mockito, Jest, and Postman**, maintaining approximately **80%+ automated test coverage**.
- Automated build and deployment workflows using **GitHub Actions/Jenkins, Docker, and AWS**, reducing manual deployment effort by approximately **30%**.
- Applied **GenAI and AI-assisted engineering** for code generation, debugging, refactoring, test creation, documentation, and code analysis, reducing repetitive development effort by approximately **20%**.

Arista Networks – Santa Clara, CA
Full Stack Developer | Jul 2023 – Jul 2024

- Developed enterprise applications and data-driven services using **Java, Spring Boot, React, REST APIs, and SQL** across **5+ business-critical modules**.
- Designed modular backend services and **15+ REST APIs** supporting business workflows and system integrations.

- Built reusable React interfaces across **10+ application screens**, improving UI consistency and maintainability.
- Integrated **8+ internal and third-party APIs** with validation, authentication, exception handling, and secure communication.
- Optimized database schemas and SQL queries, reducing execution time for targeted high-volume queries by approximately **20%**.
- Implemented automated testing with **JUnit and Mockito**, achieving approximately **75%+ coverage** across core backend components.
- Contributed to application modernization and refactoring toward **modular, service-oriented architectures**.

American College of Emergency Physicians (ACEP) – India
Java / Data Engineer | Jan 2020 – Jul 2021

- Developed enterprise applications and data-driven services using **Java, Spring Boot, React, REST APIs, and SQL**.
- Designed modular backend services and APIs supporting business-critical workflows and system integrations.
- Built reusable **React** interfaces and frontend services using component-based architecture.
- Integrated internal and third-party APIs with robust validation, exception handling, and secure communication.
- Designed database schemas and optimized SQL queries to improve application performance and data processing.
- Implemented automated testing using **JUnit and Mockito**, improving reliability across application releases.
- Contributed to application modernization, refactoring, and migration toward **service-oriented and modular architectures**.

Lifestyle Store – India
Software Engineer / ETL Developer | Jun 2016 – Dec 2019

- Developed scalable **retail and e-commerce applications** using Java, Spring Boot, React.js, MySQL, REST APIs, Jenkins, and Docker.
- Built backend microservices supporting **product catalog, pricing, inventory, customer accounts, orders, payments, fulfillment, and reporting**.
- Developed responsive React.js experiences for **product discovery, cart, checkout, customer profiles, and order tracking**, reducing UI defects by **30%**.
- Designed REST APIs for **inventory synchronization, order processing, pricing, shipment tracking, and customer notifications** across retail systems.
- Integrated secure payment workflows covering **transaction validation, authorization, reconciliation, and exception handling**, improving checkout reliability by **25%**.
- Improved application resilience using **Resilience4j circuit breakers, retry mechanisms, centralized exception handling, and structured logging**.
- Automated builds, testing, and deployments using **Maven, Jenkins, Docker, JUnit, and Mockito**, reducing release time by **35%** while maintaining **85%+ test coverage**.

EDUCATION

Master of Science in Computer Science – *California State University, Northridge, USA (2021-2023)*
Bachelor of Computer Engineering – *Pune University, India (2013-2016)*
