PRATIKSHA MALOKAR

Senior Software Developer • 7 Years of Experience
malokarpratiksha14@gmail.com | +91 8390729314 | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Senior Software Developer with 6.11 years designing, building, and scaling high-performance applications and enterprise systems across the full development lifecycle using Core Java (8/11/17), Spring Boot, ReactJS, and cloud-native technologies. Proven record of delivering revenue-impacting, high-availability software across AdTech, Capital Markets, and Telecom. Hands-on with microservices, event-driven architecture (RabbitMQ), AWS, frontend development, and production-grade GenAI/LLM agent development. Strong command of SOLID principles and API-first development.

TECHNICAL SKILLS

Languages & Core	Java 8 / 11 / 17 (Records, Sealed Classes, Pattern Matching, Structured Concurrency, Streams, Lambdas, Collections), Python 3.10, SQL, JavaScript (ES6+)
Frameworks	Spring Boot 3.x, Spring MVC, Spring REST, Spring Security, Spring Cloud, Spring Data JPA, Hibernate ORM, Struts 2, JSP / Servlet
Frontend	ReactJS, JavaScript (ES6+), JSP, Ajax, HTML5, CSS3
Microservices & APIs	Microservices Architecture, REST / API-First (OpenAPI / Swagger), Feign Client, Eureka, Resilience4j, API Gateway, Saga, Outbox
Messaging & Events	Apache Kafka (Producer / Consumer, Partitioning, Consumer Groups), RabbitMQ, Pub/Sub
AI & GenAI	AI Agent Development (Celeste), LLM Integration, Prompt Engineering, LLMOps, OpenAI API, Workflow Automation
Cloud & DevOps	AWS (EC2, S3, Lambda, API Gateway, CloudWatch), Docker, CI/CD, Maven, Git, SVN, SonarQube
Databases	Oracle 11g, MySQL, Redis (Cache & Distributed Validation), SQL Server, Query Optimisation
API & Security	RESTful API, OpenAPI / Swagger, JWT, Spring Security, RBAC, 2FA,
Testing	JUnit 5, Mockito, Unit & Integration Testing, Code Coverage, Test Automation
Methodologies	Agile / Scrum, Clean Code, Code Review, Low-Level Design (LLD), TDD, JIRA, Git

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Oct 2024 – Present

Xoriant Solutions (Client: Skai, formerly Kenshoo)

Skai is the world's leading omnichannel marketing platform, powering Fortune 500 advertisers across paid search, social, retail media, and ecommerce.

- Designed and delivered revenue-critical, high-availability REST APIs handling millions of advertising transactions per day, directly driving platform revenue growth and advertiser ROI.
- Applied Java 17 features — Records, Sealed Classes, Pattern Matching for switch, and Text Blocks — to produce cleaner, safer, and more maintainable production code.
- Engineered multithreaded data-processing pipelines using CompletableFuture, ExecutorService thread pools, and concurrent data structures (ConcurrentHashMap), ensuring thread safety under peak load.
- Built event-driven microservices with Apache Kafka (custom partitioning, consumer groups, offset control, retry logic) and RabbitMQ.

- Developed Project Celeste — a GenAI-powered automation layer (Python 3.10, LLM integration) enabling smart campaign-optimisation recommendations and end-to-end workflow automation.
- Leveraged AWS (Lambda, S3, EC2, API Gateway, DataDog) to build observable, auto-scaling, cloud-native infrastructure.
- Authored JUnit 5 + Mockito test suites, drove API-first design with OpenAPI/Swagger, led code reviews, and mentored teammates on Java best practices.
- CelesteAi - LLM, Agentic development, Writing experiments.

Tech: Java 17, Spring Boot 3.x, Spring Cloud, Apache Kafka, RabbitMQ, AWS, Python 3.10, Docker, JUnit 5, Mockito, Git, Maven

Associate / Senior Associate — Software Developer

Oct 2022 – Sep 2024

Cognizant Technology Solutions (Client: Verizon – ACT-182)

- Developed production microservices for Verizon's ACT-182 regulatory compliance platform, maintaining a 99.9% uptime SLA and telecom regulatory adherence.
- Designed secure, versioned REST APIs (OpenAPI/Swagger); reduced average API latency via query optimisation and response caching.
- Implemented JWT + OAuth2 authentication and role-based authorisation across microservice boundaries.
- Defined and versioned API contracts with ReactJS teams, ensuring seamless data exchange and backward compatibility across releases.
- Led root cause analysis and incident resolution, reducing recurring incidents through permanent systemic fixes; mentored junior developers.
- Improved CI/CD pipelines — automated builds, SonarQube quality gates, and deployment automation.

Tech: Java 8, Spring Boot, Spring Security, Microservices, JWT, OAuth2, REST, OpenAPI/Swagger, ReactJS, SQL Server, Git, Maven

System Analyst

Sep 2019 – Oct 2022

National Stock Exchange of India Ltd (NSE)

- **Trade Verification & BIDS Portal (nseindia.com):** sole developer of a high-traffic, investor-facing portal for IPO bid verification, SGB bid management, and trade verification with 2FA — serving millions of retail investors across India.
- **Bank Statement Compliance Module:** led design of a member compliance portal with an automated penalty-enforcement engine and an admin dashboard with real-time tracking and audit trails, used by regulators and exchange administrators.
- **Cash & Cash Equivalents Enhancement:** engineered a Redis-backed distributed validation engine applying real-time business rules at ingestion — eliminating data-integrity violations and reducing manual review overhead.
- Owned the full delivery cycle across all projects: requirement analysis, low-level design, development, UAT, defect resolution, and stakeholder demos.

Tech: Java 7/8, Spring Boot, Spring MVC, Hibernate ORM, Struts 2, Redis, Oracle 11g, MySQL, JSP, SVN

EDUCATION

Qualification	Board / University	Year	Score
PG-DAC	CDAC – Centre for Dev. of Advanced Computing	2019	60%
B.E. (Computer Engineering)	Savitribai Phule Pune University	2015–18	61.88%
Diploma (Computer Engineering)	MSBTE, Mumbai	2012–15	74.40%
SSC	Maharashtra State Board	2011–12	82.80%
