Location: Pune, Maharashtra, India

Experienced Full Stack Developer with strong record in designing and implementing client-server applications. Proficient in **Core Java, Spring Boot, Microservices, REST APIs, SQL, Oracle, Angular, React.js, JavaScript, and TypeScript**. Experienced in developing scalable backend services, responsive frontend applications, database solutions, API integrations, authentication, and production support.

Hands-on experience working across Healthcare, Government, Financial Services, and Enterprise applications, Code reviews, debugging, performance optimization, CI/CD, Git/GitHub, Docker, AWS, and AI-assisted development tools.

Technical Skills

- **Programming Languages:** Java/J2EE, TypeScript, jQuery
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Hibernate, Angular/React JS
- **Database Technologies:** SQL, MySQL
- **Tools & IDEs:** Eclipse, STS, Visual Studio Code, Oracle SQL Developer
- **Cloud & Deployment:** AWS, Microservices
- **Version Control: GitHub Copilot/AI-assisted development tools**

Professional Experience

Wipro Ltd., Pune

Software Engineer | Oct 2025 – Present

Project: Aldermore Bank PLC, UK | Jan 2026 – Persent

- Worked on Java Full Stack development using Java 8/17, Spring Boot, Microservices, Kafka, and Angular.
- Developed and enhanced application features and supported POCs and reusable components for banking solutions.
- Participated in code reviews, debugging, technical discussions, environment setup, and CI/CD activities.
- Used Git/GitHub and Merge Requests (MRs) for code management, review, and deployment activities.

Project: Catalyst Brands, US-Based Product | Oct 2025 – Jan 2026

- Contributed to end-to-end feature development and enhancements using React.js, Node.js, MySQL, and Figma.
- Supported CI/CD processes, code reviews, technical discussions, environment setup, and Git/GitHub workflows.
- Worked on internal upskilling and POCs related to Microservices and AWS Cloud.

Experis IT Pvt. Ltd., Bangalore

Java Full Stack Developer | Client: Accenture, Pune | Jun 2025 – Sep 2025

Project: CVS Health – Healthcare & Pharmacy Operations System

- Worked as a Java Full Stack Developer on the CVS Health project, a leading US healthcare organization.
- Picked up user stories and development tasks from Rally and implemented enhancements and

bug fixes based on business requirements.

- Developed and tested code changes using Java, Spring Boot, REST APIs, SQL, Git, and Agile methodologies.
- Created Git feature branches, developed and tested changes, and committed code using Git version control.
- Raised and managed Merge Requests (MRs) for code reviews and deployment to production environments.
- Collaborated with cross-functional teams to ensure timely delivery of project requirements.
- Participated in debugging, code reviews, testing, and application enhancement activities.

Agile Labs Pvt. Ltd., Bangalore

Java Developer | Aug 2022 – May 2025

Project 1: SAMPADA 2.0 – Property Registration Portal (MPSEDC Bhopal)

Aug 2022 – May 2025

- Designed and implemented the Search & MIS Reports module for property ownership and registration details.
- Developed Java + Spring Boot microservices with modular, scalable architecture.
- Built dynamic UI screens in Angular 12 with responsive and real-time features.
- Integrated backend services with AWS cloud, ensuring high availability and security.
- Improved data accuracy and system performance through optimized queries and caching.

Technologies: Java, Spring Boot, Microservices, Angular 12, Oracle SQL, AWS

Project 2: MPPMCL – PIMS & Finance Module (Jabalpur)

Sep 2023 – Jan 2025

- Enhanced Power Invoice Management System (PIMS) for financial workflows and electricity procurement.
- Integrated PIMS with SCM system to automate invoice reconciliation and validation.
- Built REST APIs using Spring Boot for finance, SCM, and accounting modules.
- Wrote complex SQL / PL-SQL procedures for bill settlement, ledger posting, and MIS reporting.

Technologies: Java 8, Spring Boot, SQL/PL-SQL, Apache Tomcat

ICICI Prudential Life Insurance, Mumbai

Software Developer | Mar 2020 – May 2022

- Developed and maintained Java-based applications for customer and internal systems.
- Worked on Oracle Forms, Reports, BI Publisher, and Jasper Reports.
- Implemented REST APIs and microservices for smooth data exchange across platforms.
- Supported backend modules using Java 8, Spring Boot, Oracle SQL, Angular.

Education

B.Tech in ME

Jawaharlal Nehru Technological University (JNTU), Hyderabad ***(May 2013 - Jun 2017)***

Achievements & Interests

- **Round of Applause Wipro (March 2026):** Recognized as a **key player in the team/project** for valuable contributions toward building an **inclusive and collaborative work environment**.
- Received **Best Engineer – Spot Award** for outstanding contribution.
- Received **Excellent Rating** for strong performance and contribution.
- Participated in **UAT and production deployment activities** to ensure smooth application releases.
