SATTYAJIT ZARKAR

Java Backend Developer | Spring Boot | Microservices | 7.6+ Years Experience

+91-950-395-2106 • zarkarsattyajit@gmail.com • linkedin.com/in/sattyajit-zarkar-7682b4324

PROFESSIONAL SUMMURY

- Java Backend Developer with **7.6+** years designing, developing, and maintaining enterprise applications across Healthcare and BFSI domains.
- Deep expertise in **Java 8**, **Spring Boot**, **Spring MVC**, **Microservices**, **RESTful APIs**, **Spring Security**, **Hibernate**, and **Spring Data JPA**.
- Experienced building scalable microservices with **Spring Cloud** (Eureka, Config Server, API Gateway) across **Oracle 19c**, **DB2**, and **MongoDB**.
- Hands-on with **Spring Kafka**, **Spring Batch**, **JUnit**, **Mockito**, **Jenkins**, **Git**, and **SonarQube**; skilled in Agile Scrum, API integration, and production support for secure, high-performance backend systems.

TECHNICAL SKILLS

Programming Language	Java 8
Frameworks & Technologies	Spring, Spring Boot, Spring MVC, Spring Data JPA, Spring Batch, Spring Kafka, Spring Cloud, Hibernate, React (Basic)
Architecture	Microservices, RESTful Web Services, Distributed Systems, JDBC, Service Discovery (Eureka), API Gateway, Config Server
Design Patterns	Singleton, Factory, Proxy, Builder, Strategy, Circuit Breaker, Service Discovery Pattern
Databases	Oracle 19c, DB2, MongoDB
Messaging	Apache Kafka (Consumer & Producer APIs)
Application Server	Apache Tomcat
Testing & Code Quality	JUnit, Mockito, PowerMockito, SonarQube
API Testing & Documentation	Postman, Swagger/OpenAPI
Logging & Monitoring	Log4J
Methodology	Agile (Scrum), SDLC, Requirement Analysis, Code Reviews
DevOps Tools	Git, Jenkins CI/CD, Github Copilet

KEY HIGHLIGHTS

- **7.6+ Years** of **enterprise Java backend development** experience across **Healthcare** and **BFSI domains.**
- Built **RESTful APIs** and **multiple Spring Boot microservices** supporting business-critical applications.
- Developed distributed microservices architecture using **Spring Cloud components** including **Eureka, Config Server** and **API Gateway.**
- Implemented **secure backend services** using **Spring Security** with **authentication, authorization** and **role-based access control.**
- Integrated **Apache Kafka** for **asynchronous communicatio**n and event-driven processing between microservices.
- Designed optimized database solutions using **Oracle 19c, DB2, MongoDB, Spring Data JPA** and **Hibernate.**
- Developed **Spring Batch jobs** for high-volume **data processing, validation,** and **scheduled execution.**

PROFESSIONAL EXPERIENCE

Software Engineer — Carelon Global Solutions

Hyderabad, India | *July 2020 – Present*

Project: Case Installation Application (CIA)

Client: Elevance Health (Healthcare) | **Domain:** Healthcare Insurance | **Duration:** June 2024 – Present

Project Description: Enterprise healthcare platform built for Elevance Health to automate onboarding and installation of new employer group health plans. Processes employer group data, validates member and policy information, configures healthcare plans, assigns benefit packages, and activates coverage.

Roles & Responsibilities:

- Engineered backend modules in **Java 8**, **Spring Boot**, and **Spring MVC** to automate onboarding of new employer group health plans.
- Designed **RESTful APIs** driving employer group onboarding, case installation workflows, member enrollment and coverage activation.
- Built dedicated **microservices** for case creation, eligibility validation, benefit-package assignment, and policy configuration.
- Secured API endpoints with **Spring Security**, implementing token-based authentication and role-based access control.
- Developed the persistence layer with **Spring Data JPA** and **Hibernate** to manage employer, member, and plan configuration data.

Project: Electronic Eligibility Transfer (EET RNo)

Client: Elevance Health (Healthcare) | **Domain:** Healthcare Insurance | **Duration:** July 2020 – May 2024

Project Description: Automated and streamlined healthcare member eligibility verification and enrollment processing across multiple providers, insurance exchanges, and internal systems. Validates eligibility requests, processes enrollment and policy updates, manages benefit information, and exchanges healthcare data through REST-based microservices.

Roles & Responsibilities:

- Built scalable backend services in **Java 8**, **Spring Boot**, and **Spring MVC** to automate member eligibility verification.
- Designed **RESTful APIs** for real-time eligibility checks, enrollment processing, benefit validation, and policy inquiries.
- Delivered **microservices** handling eligibility request intake, member data lookups, policy validation, and transaction processing.
- Enforced **Spring Security** authentication and role-based authorization across all eligibility-transfer endpoints.

Software Engineer — Tetrasoft India Pvt Ltd

Hyderabad, India | *January 2019 – June 2020*

Project: Digital Banking Platform Modernization

Client: Bank of America (BFSI – Retail & Digital Banking) | **Domain:** BFSI | **Duration:** Jan 2019 – Dec 2021

Project Description: Modernized Bank of America's online and mobile banking applications by migrating legacy systems to a microservices-based architecture. Enabled customers to securely manage accounts.

Roles & Responsibilities:

- Migrated legacy banking modules to **Java 8**/**Spring Boot** services as part of a microservices modernization initiative.
- Designed **RESTful APIs** for customer accounts, fund transfers, beneficiary management, and bill payments.
- Built **microservices** covering Customer Management, Account Services, Transaction Processing, and Notification Services.
- Secured banking APIs with **Spring Security**, implementing authentication and fine-grained authorization controls.

EDUCATION

Bachelor of Engineering — Electronics & Telecommunication

Sant Gadge Baba Amravati University | First Class

DECLARATION

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
