Pune, Maharashtra • +91 9049131045 • saurabhjadhav9308@gmail.com • linkedin.com/in/jadhavsaurabh02

**Senior Java Developer**

Senior Java Developer with 5 years of experience designing and developing scalable cloud-native enterprise applications using Java, Spring Boot, Microservices, REST APIs, Kafka, and AWS. Experienced in event-driven architecture, distributed systems, and containerized deployments on Kubernetes. Strong expertise in debugging, performance optimization, unit testing using JUnit/Mockito, and delivering high-quality software in Agile environments.

## SKILLS

**Programming:** Java (Core Java, Java (8/11/17/21)), Object-Oriented Programming, Multithreading Concepts

**Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Cloud, Hibernate

**Architecture:** Microservices, RESTful API Development, Distributed Systems, Cloud-Native Architecture, Service-Oriented Architecture (SOA)

**Security:** Spring Security, Authentication & Authorization, JWT, OAuth 2.0, API Security

**Databases:** MySQL, Oracle, PostgreSQL

**Messaging & Caching:** Apache Kafka, Redis

**Tools:** Git, Git Lab, Swagger/Open API, Maven, Postman, JMeter, Sonar Cube, IntelliJ IDEA, Eclipse, CI/CD pipeline

**DevOps & Platforms:** AWS (Amazon S3, EKS, IAM, EC2), Docker, Kubernetes, Linux

**Testing:** JUnit, Mockito

**Monitoring:** Splunk, Grafana

**AI Assisted Development:** GitHub Copilot, Devin, Cursor

**Methodologies:** Agile Scrum, SDLC, Code Review, Production Support

**Design Patterns:** Singleton, Factory, Builder

## PROJECTS

### T-Mobile For Business

11/2024 - Present

Infosys Limited

Working on the T-Mobile for Business platform, a large-scale telecom e-commerce application supporting device purchases, accessory sales, and service management for business customers. Contribute to the Checkout domain by developing and maintaining microservices that handle order fulfillment, checkout processing, and downstream business operations.

## WORK EXPERIENCE

### Infosys Ltd

**11/2024 - Present**

**Senior Associate Consultant**

**Pune**

- Developed and enhanced Spring Boot microservices and REST APIs supporting enterprise telecom applications within a distributed microservices ecosystem.

- Investigated and resolved critical production incidents through log analysis using Splunk, minimizing business impact and improving application stability.
- Optimized application performance through code refactoring, query tuning, and implementation of engineering best practices, resulting in improved response times and maintainability.
- Implemented comprehensive unit testing using JUnit and Mockito, increasing code reliability and reducing production defects.
- Collaborated with frontend teams working on ReactJS applications and API integration.
- Designed and supported event-driven integrations using Apache Kafka for asynchronous communication between microservices.
- Led remediation of high and critical security vulnerabilities identified through automated security scans, achieving 100% compliance for assigned applications.
- Contributed to end-to-end software delivery, including requirement analysis, development, testing, deployment, and production support in Agile Scrum teams.
- Leveraged GitHub Copilot to accelerate development activities, improve code quality, and enhance team productivity.

**Accelya Services India Pvt Ltd** **07/2024 - 11/2024**
**Software Engineer II**

- Worked on airline cargo and logistics platform supporting airline retail operations.
- Participated in full software development lifecycle including design, development, testing, and deployment.
- Develop unit tests using JUnit and Mockito to ensure code reliability, maintainability, and improved test coverage.
- Developed backend services using Java and Spring Framework.
- Implemented accessibility enhancements on the application platform, resolving accessibility issues and improving usability compliance by 30%

**3i Infotech Ltd** **10/2021 - 07/2024**
**Senior Software Engineer**

- Developed cloud-native microservices deployed on AWS EKS following service-oriented and distributed architecture principles.
- Supported containerized deployments and cloud-native application development using Docker and Kubernetes.
- Migrated the logging framework from Log4j 1.x to Log4j 2.x, replacing legacy programmatic configuration with XML-based configuration to improve logging performance, maintainability, and security compliance.
- Performed code reviews, vulnerability remediation, and secure coding implementation following enterprise security standards
- Implemented dynamic resource allocation for Apache Spark workloads using executor scaling, enabling efficient resource utilization and improving processing performance based on cluster load.
- Utilized AWS EKS for container orchestration and Amazon S3 for object storage, supporting scalable deployment and efficient data storage for the analytics reporting platform.

## EDUCATION

**Post Graduate Diploma in Advanced Computing (PG-DAC)**
CDAC Mumbai — Mumbai

**Bachelor of Engineering**
Shivaji University, Kolhapur — Kolhapur

## CERTIFICATIONS

**GitHub Copilot Certification (GH-300)** 01/2026
GitHub | Microsoft Learn
