Saurav Kumar Mukim

Mobile: +91 8709275844 E-mail: saurav.mukim92@gmail.com

Career Objective

- To acquire a position more challenging and suited to my skills and capabilities.
- Endeavor to make the best use of my skill sets/potential to benefit the organization.
- Seeking an optimistic work environment where I can invest my time and efforts into effective use.

Professional Summary

- 8 years of Experience in Software Development.
- Experience in developing Web Based Application using Java, J2EE, Spring MVC, Spring REST, Spring Boot, RESTFUL Services, Hibernate , JPA , API & Microservices.
- Experience in working with Oracle Database with expertise in SQL Standards.
- ExperiencedwithtoolslikeMaven,GIT, Jenkins & Aws fundamentals.
- Experience in working in Front end technologies like jQuery, HTML, CSS, Angular .
- Experience in Complete **Software Development Life Cycle (SDLC)** including Designing, Coding, Development and Testing with Methodologies like Agile, Scrum.
- Proficient at grasping new technical/business concepts quickly and implementing the same in a productive manner along with good team working attitude.

Technical Skills

Languages	Java
Framework	Spring Framework , Spring Boot , MicroServices, Hibernate
Web Technologies	HTML 5, CSS , jQuery,JavaScript, Angular
Databases	SQL Server , Oracle
Web Servers	Tomcat Server
Version Control Software	SVN , GIT
Tool IDES	Eclipse IDE, Visual Studio Code, Build Tool - Maven, Agile Methodology, Jenkins , Kubernates, Docker.

Work Experience

Working as a Senior Software Engineer in HCL Technologies from September 2021 – till date

Worked as a Application Developer Analyst at Accenture from April 2020 to August 2021.

Worked as a Senior Software Engineer at Wipro Ltd. from March 2017 – April 2020.

Professional Achievements

Secured **excellent , high valued** rating for my performance and **Customer appreciation** too.

Awarded with **' Star of the Week ' , 'Star Techie'** for the contribution towards the project (Wipro).

Completed Cloud **Certification on Azure.**

Education

2012 to 2016 Bachelor of Technology (E.C.E) **8.40/10 (CGPA)**
National Institute Of Science & Technology, Berhampur,Odisha

2011 Class XII (Senior School Certificate Examination) **78.6 %**
Sri Krishna Vidya Mandir, CBSE , Ramgarh Jharkhand

2009 Class X (Secondary School Examination) **87.33%**
S G N SR SEC Public School , CBSE, Ramgarh Jharkhand

Project Details

Project #1(Wipro)

Name : **TOPS (Total Operation System) | NextGen Airline Flight Operation Solution**

Software and Tools Used : Spring MVC, Spring REST, Hibernate, Java , Oracle Sql Developer, Spring Boot, HTML 5, CSS, jQuery, Ajax, JavaScript, Eclipse IDE.

Role : Developer

Project Description

'TOPS – Total Operation System' is an integrated product Suite designed to support all major processes in airline flight operations like Aircraft Scheduling and Maintenance, Aircraft Movement Control , Flight Watch, Overflying & Tracking, Crew Level Management. This system is extremely user friendly, configurable , provide graphical gantt charts to display flights, maintenance activities, easy and quick access to multiple level of information and accessible across locations and devices with a browser based application.

Responsibilities :

- Participating in Client calls for understanding/ gathering of the requirements and performing requirement analysis.
- Involved in the development of various modules & change request of existing functionality.
- Designing multiple Master Screens/ UI or Web pages of the Application using HTML, CSS, jQuery, Java Script, Ajax.
- Writing efficient, reusable, reliable Java code, Controllers and Services for the various modules.
- Writing DB Scripts for various operations like DDL, DML etc.
- Writing Rest Services calls & configuring Spring Boot required for the application.
- Defect Fixing and Debugging (both UI and backend) before handling for SIT.
- Working under Agile Environment

Project #2(Accenture)

Name **: AD Consumer sales (AT & T)**

Software and Tools Used : Microservices, Spring MVC, Spring REST, Hibernate, JPA, Java 1.7/8, Oracle Sql Developer, Spring Boot, Mapstruct GIT, Jenkins, Maven , Junit, Eclipse IDE, Postman.

Role : Application Development & Testing

Project Description

This is a Order Management System which has a major component –ManageOmniOrder and InquireOmniOrder. ManageOmniOrder Section deals with managing Order like, Create Order, Update, Add an Item order etc and InquireOmniOrder deals with fetching Order Details , Order Summary , etc.
It is a microservice based application and the response is consumed in UI side by Various applications.

Responsibilities:

- Participating in Client calls for understanding/ gathering of the requirements and performing requirement analysis.
- Writing efficient, reusable, reliable Java code, Controllers and Services for the various modules.
- Involved in the development of various modules & change request of existing functionality.
- Writing Code for Publishing/Consuming message from kafka.
- Writing MapStruct Mapping files to map incoming input attributes to output.
- Writing Junit test cases and performing Regression Testing, Documenting Test Scenarios etc before Production release.
- Continuous Integration / Deployment using Jenkins.
- Writing DB Scripts for various operations like DDL, DML etc.
- Writing Rest Services calls & configuring Spring Boot required for the application.
- Defect Fixing and Debugging (both UI and backend) before handling for SIT.
- Working under Agile Environment.

Project #3(HCL Technologies)

Name : **FAB – First Abu Dhabi Bank(UAE)**

Software and Tools Used : Microservices, Spring MVC, Spring REST, Hibernate, JPA ,Java , Oracle Sql Developer, Spring Boot, Lomabard, Mapper. GIT, Jenkins, Maven , Junit, Eclipse IDE, Postman ,Angular 6/8.

Role : Application Development

Project Description

FAB- First Abu Dhabi Bank , Is a largest bank in UAE. Integrating and developing a new Product – Travel Insurance to the existing Bank Application. Travel Insurance is new Product Suite designed to handle end to end solution to insure travelers through their journey.
It provide feature to traveler to insure their trip for world Wide , domestic trips, supporting features like fetching insurance quotes from different vendors, Managing Policies, Confirming Payments, Reviewing and download Policy and many other features.
This system is extremely user friendly, configurable ,Reports Generations , supporting app and web based application and quick access to multiple level of information.

Responsibilities:

- Participating in Client calls for understanding/ gathering of the requirements and performing requirement analysis.
- Involved in the development of various modules & change request of existing functionality.
- Designing and developing Microservices systems with Java, Springboot , JPA- using other Java Tech Stack.
- Writing Code for Publishing/Consuming message from kafka.
- Writing MapStruct Mapping files to map incoming input attributes to output.
- Writing Junit test cases and performing Regression Testing, Documenting Test Scenarios etc before Production release.
- Continuous Integration / Deployment using Jenkins.
- Writing efficient, reusable, reliable Java code, Controllers and Services for the various modules.
- Writing Rest Services calls & configuring Spring Boot required for the application.
- Writing DB Scripts for various operations like DDL, DML etc.
- Defect Fixing and Debugging (both UI and backend) before handling for SIT.
- Working under Agile Environment.
