PROFESSIONAL SUMMARY

Results-oriented Java Backend Engineer with 5+ years of experience building scalable, distributed, and fault-tolerant backend systems using Java, Spring Boot, Microservices, Kafka, Redis, AWS. Skilled at designing RESTful APIs, optimizing SQL/NoSQL queries, implementing clean, maintainable architecture, and building dynamic front-end interfaces with React in Agile environments.

TECHNICAL SKILLS

Languages: Java (8/11/17), JavaScript, SQL, NoSQL

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, Microservices, REST, gRPC, React.js

Databases: MySQL, PostgreSQL, MongoDB, Redis (caching)

Cloud & DevOps: AWS (EC2, S3, RDS, ECS), Docker, Kubernetes, Jenkins, GitLab CI/CD

Messaging: Kafka, RabbitMQ, ActiveMQ

Tools: Git, JIRA, Swagger, Postman, JUnit, Mockito, Prometheus, Grafana

Concepts: API Design, System Design, Domain-Driven Design, Clean Architecture, TDD, Agile

EXPERIENCE

BharatPe — SDE II (via Hashstudioz Technologies Pvt. Ltd.)

Aug 2024 – Present

- Architected a Distributed Invoicing System for 100K+ agents using JobRunr, gRPC, Kafka, enabling reliable async scheduling and guaranteed message delivery.
- Built backend-driven Dynamic Personalization Engine with rule-based cohortization; improved merchant portal response time from 800ms to 200ms.
- Implemented Redis cache + Kafka events for real-time UI updates, cutting data latency by 75%.
- Integrated multiple third-party payment/recharge APIs with resilient retry logic and circuit-breaker patterns ensuring 99.9% uptime.

Samsung — Database Administrator (via Hashstudioz Technologies Pvt. Ltd.)

Feb 2024 – Apr 2024

- Enhanced database performance by rewriting SQL procedures and indexes, achieving 45% query speed improvement.
- Migrated legacy data to optimized PostgreSQL schemas with constraint validation and backup automation.
- Collaborated with QA teams to validate data integrity and optimize bulk insertion processes for critical analytics modules.

IIT Delhi Portal — SDE I (via Hashstudioz Technologies Pvt. Ltd.)

Mar 2023 – Dec 2023

- Developed RESTful APIs in Spring MVC for student management and course workflow modules; reduced system crashes by 35%.
- Implemented transactional data handling and multi-level cache using Redis to accelerate API responses by 60%.
- Designed front-end pages using React.js, JavaScript, and jQuery for dynamic student-facing interfaces.

NRC Project — SDE I (via Hashstudioz Technologies Pvt. Ltd.)

Aug 2022 – Feb 2023

- Designed microservices for identity management and citizen record validation using Spring Boot and Kafka.
- Built batch processing pipelines for large-scale data imports and status notifications with ActiveMQ.
- Deployed services on AWS EC2 with CI/CD through GitLab, ensuring zero-downtime deployments.

Westcliff University Portal — Software Engineer (via Hashstudioz Technologies Pvt. Ltd.)

Mar 2022 – Aug 2022

- Created secure student and course management APIs with JWT authentication and role-based access control.
- Integrated MySQL database with Spring Data JPA, ensuring transaction consistency and audit logging.
- Automated student enrollment flows and real-time report generation using Spring Scheduler and REST clients.

Ticket Booking System — Backend Engineer (via Hashstudioz Technologies Pvt. Ltd.)

Nov 2021 – Mar 2022

- Designed and implemented a Train Booking Platform supporting 1 million+ concurrent users with Redis locks for seat allocation.
- Built microservices for booking, payment, and trip scheduling integrated through Kafka event streams.
- Delivered group/voucher booking features and QR-based ticket validation modules reducing fraud incidents by 25%.

PERSONAL PROJECTS

E-Commerce Website — Java Spring MVC + React.js (Individual Project)

- Developed a full-stack E-Commerce platform with user and admin portals built using React.js on the frontend, supporting product catalog, search, cart, and checkout modules.
- Implemented responsive UI components in React with state management, improving user experience and reducing page load time.
- Implemented secure authentication using Spring Security and Hibernate ORM with MySQL backend.
- Built admin dashboard for CRUD operations, order management, and real-time inventory tracking.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Samalkha Group of Institutions | 2017 – 2021 | CGPA: 7.5

ACHIEVEMENTS & CERTIFICATIONS

- Behind the Scenes Hero Award — Recognized for backend optimization and system stability enhancements.
- Core Java Certification, Delhi Institute of Computer Science (DICS) — OOP, JDBC, Spring Fundamentals.
- Spring Boot Microservices Training, Hashstudioz Internal Program — Dockerization, CI/CD, Monitoring.
