Mr. Suraj Surwase | JAVA BACKEND DEVELOPER

surajdevmail108@gmail.com | 7030402905 | https://www.linkedin.com/in/suraj-surwase-0aa148126

SUMMARY

Java Backend Engineer with around **5** years of experience in building and supporting **Spring Boot**–based **microservices** for **fintech**, **e-trading** and tax & accounting platforms. Strong expertise in Core Java, data structures, REST APIs, distributed systems, and production observability using OpenTelemetry and Datadog and foundational cloud knowledge backed by AWS Certified Cloud Practitioner certification. Experienced in B2B/B2C business workflows, CI/CD integration, and performance monitoring.

SKILLS

Programming Languages : Java, SQL
Backend Frameworks : Spring Boot, Spring MVC, Hibernate, JPA
Databases : MySQL , PostgreSQL
Cloud & DevOps : AWS, GitLab CI/CD, yaml
Testing and Validation : Junit, Cucumber
Architecture : Microservices, REST APIs
Dev Tools : Git, IntelliJ , Spring Tool Suite(STS) , VS Code

EXPERIENCE

Software Engineer 2 | HashedIn by Deloitte , Pune — Aug 2024 - Present

- Engineered a Java-based integration and service-validation framework for a high-volume e-trading platform, interacting with multiple **Spring Boot microservices** handling orders, executions, and market data, supporting both B2B and B2C trading workflows.
- Developed reusable core libraries, utilities, and abstractions using **Java**, OOP principles, and **advanced data structures** to support complex trading workflows and validations.
- Designed and implemented a custom execution **reporting layer** using the Extent Reports framework to provide structured insights, run analytics, and traceability for service-level executions.
- Acquired strong **trading markets domain expertise**, including **futures trading, liquidity concepts, order types, market depth**, and exchange-driven constraints, and applied this knowledge directly in backend scenario design.

Software Engineer | Wolters Kluwer , Pune — May 2023 - Aug 2024

- Developed and maintained **Spring Boot**-based backend services for a tax and accounting platform, implementing business logic, REST APIs and backend integrations.
- Designed and implemented end-to-end **observability** for Java applications using OpenTelemetry, instrumenting distributed tracing, structured logging, and custom metrics.
- Integrated applications with **Datadog** by configuring the **Datadog Java Agent**, enabling automatic and manual instrumentation for performance monitoring and root-cause analysis.
- Worked closely with DevOps and platform teams to deploy and validate observability data in the **Datadog backend**, enabling **dashboards** and **alerts**.
- Actively monitored production issues using **Datadog APM, Log Explorer, and Metrics**, reducing mean time to detect (MTTD) and resolve (MTTR) incidents.

Junior Engineer | IKS Health , Mumbai — Nov 2021 - Mar 2022

- Designed and improved **REST** endpoints using Java and Spring Boot for an online retail platform, covering areas like inventory listings, account login, shopping cart flow, and order processing.
- Integrated persistence layer with MySQL through JPA and Hibernate, handling CRUD functionality and crafting efficient queries for reliable data access.
- Contributed to issue resolution, codebase cleanup, and unit test development with JUnit, maintaining code quality and following clean coding standards.

Graduate Engineer Trainee | Valmont , Pune — Nov 2019 - Jan 2021

- Developed and enhanced **Java** and **Spring Boot Restful APIs** for an e-commerce application, supporting modules such as product catalog, user authentication, cart and order management.
- Implemented database integration using **JPA/Hibernate** with **MySQL** ,performing CRUD operations and writing basic optimised queries.
- Assisted in bug fixing, code refactoring and unit testing using **Junit**, ensuring adherence to clean code principles.

PROJECTS

E-Trading Application for a leading banking client

Tech Stack: Spring Boot , Java , SQL , JPA, Microservices , Cucumber

- Built a Java-based integration framework to validate backend service behaviour for B2B and B2C e-trading workflows across futures and bond markets.

- Implemented service-level validations for order placement, execution, and trade lifecycle, eliminating manual verification errors.
- Improved execution reliability and performance through reusable backend components and parallel execution strategies.

Observability - Axcess Remediation (Tax & Accounting)

Tech Stack: Spring Boot , Java , Datadog , Hibernate, JPA, Microservices

- Implemented observability using open telemetry and **Datadog**
- Automatic and manual instrumentation to collect telemetry data (traces, logs and metrics)
- Built different services in **java spring boot** for communicating with various services using **RestTemplate**.

EDUCATION

PG Diploma Sep 2022 - Mar 2023
Sunbeam Institute of Technology, Pune

Bachelor of Engineering Jun 2015 - Jul 2019
Sinhagad Institute of Technology, Pune

CERTIFICATION

AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services, 2026

AWARDS & RECOGNITION

Monthly Excellence Award, *HashedIn By Deloitte* – **March 2025 , October 2025**
