# Vishal Kumar

*Technical Lead · Full-Stack Engineer · Distributed Systems · Cloud-Native · AI-Augmented Engineering*
ervishalyadav1411@gmail.com | +91 83685 72520 | Pune, Maharashtra | linkedin.com/in/vishal-kumar-a84b3816b

**Key Skills:** Java | Spring Boot | Microservices | REST & gRPC APIs | Apache Kafka | System Design | Kubernetes | Docker | CI/CD | GCP | Azure | AWS | ReactJS | PostgreSQL | Redis | Technical Leadership | GitHub Copilot | Agentic AI | Prompt Engineering | LLMs (GPT-4, Claude) | AI-Assisted HLD/LLD & Unit Testing

## Professional Summary

Technical Lead with 8+ years of experience designing, building, and scaling distributed systems and cloud-native microservices for Banking, E-Commerce, and Analytics products. Proficient in Java, Spring Boot, ReactJS, Apache Kafka, gRPC, and multi-cloud deployments (GCP, Azure, AWS). Experienced in AI-augmented software engineering - using GitHub Copilot with GPT-4, Claude, and other LLMs for codebase comprehension, prompt-engineered technical design documentation, automated unit test generation, and AI-assisted HLD/LLD analysis. Proven record of leading cross-functional Agile teams, conducting system design and architecture reviews, and delivering high-availability, fault-tolerant platforms serving millions of end users. Strong communicator bridging engineering and business stakeholders.

## Technical Skills

**Languages:** Java (8/11/17), Python, JavaScript (ES6+), TypeScript, C, C++

**Backend Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Microservices, REST API, gRPC, Servlets, JSP, JDBC

**Frontend:** ReactJS, HTML5, CSS3, jQuery, AJAX

**Messaging/Streaming:** Apache Kafka, RabbitMQ, Event-Driven Architecture

**Databases:** PostgreSQL, MS SQL Server, MySQL, Oracle, Snowflake, Teradata, Redis, IBM Db2

**Cloud Platforms:** GCP (GKE, Cloud Build, Cloud Run, Logging), Azure (AKS, Functions, DevOps), AWS (EC2, RDS, Lambda, S3)

**DevOps / CI-CD:** Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions, Harness, JFrog Artifactory, Liquibase

**Observability:** ELK Stack (Elasticsearch, Logstash, Kibana), Datadog APM, SonarQube, GCP Cloud Logging

**AI / Agentic AI / GenAI:** GitHub Copilot (agentic mode), ChatGPT (GPT-4), Claude, Gemini, Ollama, RAG, Prompt Engineering, Vector Databases, AI-Assisted Code Comprehension, AI-Generated Technical Design Documents (HLD/LLD), AI-Assisted Unit Test Generation, AI-Driven Design Review & Analysis, NumPy, Pandas, Matplotlib

**Architecture:** System Design, Microservices, Event-Driven, CQRS, Saga Pattern, Circuit Breaker, API Gateway, Eureka

**Tools & Practices:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Rally, Agile (Scrum/SAFe), TDD, Design Patterns

## Professional Experience

### Technology Lead - Bitwise Inc. - Pune, India
*Sep 2025 – Present*

*Project: Enterprise Banking Application Modernization*

- Architected decomposition of a monolithic core banking platform into 15+ cloud-native microservices on GCP, reducing deployment lead time by 40%.
- Designed high-availability REST and gRPC APIs for critical banking operations (payments, accounts, compliance) with 99.99% SLA and sub-100 ms p95 latency.
- Led full-stack delivery (Java 8, Spring Boot, ReactJS, RabbitMQ, PostgreSQL/MS SQL); drove event-driven architecture via Kafka, and established CI/CD on GCP with SonarQube quality gates, cutting production defects by 30%.
- Integrated GitHub Copilot (GPT-4, Claude, and other LLMs) into the engineering workflow for AI-assisted codebase comprehension, prompt-engineered HLD/LLD generation, and AI-assisted unit test authoring across 15+ microservices, cutting documentation turnaround time and accelerating engineer ramp-up.
- Authored ADRs and led architecture/design reviews for the monolith-to-microservices migration (service boundaries, REST vs gRPC, saga-based transactions); mentored 8 engineers and led 2 teams of 45 across the banking domain.

***Stack:*** *Java 8, Spring Boot, ReactJS, gRPC, Kafka, PostgreSQL, GCP (GKE, Cloud Build), Kubernetes, GitHub Copilot, Claude, ChatGPT, Prompt Engineering*

### Technical Lead - Hexaware Technologies
*Sep 2024 – Aug 2025*

*Project: Carrier Dashboard (CDB) & Document Retrieval System (DRS) - ARC (Airline Reporting Corporation)*

- Built real-time airline analytics dashboard ingesting multi-terabyte data from Oracle, Teradata, and Snowflake; reduced report generation from hours to <10 seconds.
- Developed Document Retrieval System processing 500K+ documents/day with Elasticsearch, achieving sub-second query response; optimised SQL and introduced Redis caching, cutting p95 API latency by 60%.
- Managed containerised deployments on Azure AKS with GitLab CI/CD, cutting release cycles from bi-weekly to daily; integrated Datadog APM, reducing MTTR by 45%.

***Stack:*** *Java 8, Spring Boot, ReactJS, Oracle, Teradata, Snowflake, Azure AKS, GitLab CI/CD, Datadog, Redis, Elasticsearch*

**Senior Software Engineer - IBM India Pvt. Ltd.** *Aug 2024 – Sep 2024*

*Project: Digital Banking Platform*

- Enhanced a cloud-native digital banking platform (account management, fund transfers, loan origination) serving millions of retail customers.
- Implemented OAuth 2.0/JWT and fine-grained RBAC, passing PCI-DSS audit with zero critical findings; resolved N+1 query bottlenecks via ELK profiling, improving API throughput by 35%.

***Stack:*** *Java, Spring Boot, OAuth 2.0, JWT, Azure, Kubernetes, ELK Stack*

**Custom Software Engineering Analyst - Accenture** *Oct 2021 – Aug 2024*

*Project: Enterprise E-Commerce Platform (SAP Hybris)*

- Developed high-traffic e-commerce platform (Java, Spring Boot, SAP Hybris, ReactJS) supporting 5M+ SKUs and 10K concurrent peak users; designed RESTful APIs for cart, checkout, and order management.
- Implemented Jenkins CI/CD with Blue/Green deployments on Azure, cutting rollback time from 2 hours to under 5 minutes; Redis caching and Kafka async processing cut average response time by 40%.

***Stack:*** *Java, Spring Boot, SAP Hybris, ReactJS, Azure, Jenkins, Kafka, Redis*

**Project Engineer - C-DAC Chennai - Govt. of India** *Sep 2019 – Sep 2021*

- Delivered AI-powered chatbot and Python/NLP applications (scikit-learn) for Ministry of Defence digital transformation initiatives; optimised SQL queries, reducing reporting time by 50%.

**PG-DAC Trainee / Project Intern - C-DAC Hyderabad** *Feb 2018 – Aug 2018*

- Completed PG Diploma in Advanced Computing; built a full-stack capstone (Java, Spring MVC, Hibernate, MySQL); ranked in top cohort of the batch.

**Customer Relationship Manager (CRM) - Hinduja Global Solutions (HGS)** *Mar 2017 – Aug 2017*

## Key Achievements

- Scalability: Led zero-downtime migration from legacy monolith to microservices handling 50K+ TPS at Bitwise Inc.
- Reliability: Achieved 99.99% SLA on IBM Digital Banking platform using Resilience4j circuit breakers and chaos-engineering practices.
- AI/GenAI: Prototyped RAG-based internal support chatbot (LLM + embeddings + vector DB), reducing L1 support tickets by 25%.
- Agentic AI / Developer Productivity: Adopted GitHub Copilot with GPT-4 and Claude across the engineering team for codebase comprehension, AI-generated HLD/LLD documentation, and automated unit test authoring, reducing documentation and ramp-up time on the banking modernization project.

## Additional Architecture & Leadership Highlights

- Selected event-driven architecture (Kafka) over synchronous REST for transaction processing - reduced coupling across 15+ services and improved throughput 3x; recommended Snowflake over traditional RDBMS at Hexaware, with a Redis L1 + DB query cache L2 strategy adopted org-wide.
- Established a structured design review process at Bitwise (mandatory docs for features touching >2 services), cutting production incidents by 35%; conducted 50+ code/design reviews and led cross-team OpenAPI contract reviews at Accenture and Hexaware.
- Applied structured prompt engineering to generate first-draft HLD/LLD documents from architecture notes and to cross-check design artifacts against standards, surfacing gaps earlier in the design cycle.
- Served as primary technical interface for stakeholders and auditors, translating PCI-DSS/GDPR requirements into engineering criteria; defined hiring bar and ran 30+ interviews, scaling the backend team from 4 to 12 engineers in 8 months.

## Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900), Azure Developer Associate (AZ-204), DevOps Engineer Expert (AZ-400)
- AWS Certified Developer - Associate
- IBM Certified: Python for Data Science & Artificial Intelligence
- Full Stack Automation Certification (AI, Data Analytics, Python, Automation Anywhere, DevOps)

## Education

PG Diploma in Advanced Computing (PG-DAC) - C-DAC Hyderabad · Feb 2018 – Aug 2018

B.Tech - Computer Science & Engineering - Uttar Pradesh Technical University · Jun 2012 – Aug 2016

**Languages:** English - Fluent | Hindi - Native | French - Intermediate
