VIVEK B NALAWADE

Java Developer | Tech Lead

Phone: 09356003856 | Email: Viveknlwd@gmail.com

PROFILE

I am an IT professional with 8.2 years of overall experience, including 2 years of team handling. I enjoy continuously learning and expanding my skill set while building scalable and efficient solutions.

EDUCATION

Qualification	University / Board	Year
B.E (Mechanical)	Shivaji University	2017
DME (Mechanical)	M.S.B.T.E	2013
S.S.C	Maharashtra State Board	2010

SKILLS

- ✔ **Java**
- ✔ **Spring Boot**
- ✔ **Microservices**
- ✔ **Apache Kafka**
- ✔ **React JS**
- ✔ **Angular**
- ✔ **SQL / NoSQL**
- ✔ **Cloud (AWS, GCP)**

Soft Skills:

Problem Solving | Teamwork | Communication

Hobbies:

- Travelling
- Reading Technical Books & Articles
- Making Music
- Learning new things

WORK EXPERIENCE

Sr No	Organisation Name	From	To	Role
1	Tech Mahindra Ltd	Sept 2024	Nov 2025	Technical Lead
2	Cognizant Technology Services	Aug 2022	May 2024	Software Engineer
3	Tata Consultancy Services	Jan 2021	Aug 2022	Software Developer
4	Meteor Softech Pvt Ltd	July 2017	Nov 2020	Software Developer

Tech Mahindra Ltd, Pune (Sept 2024 – Nov 2025)

T Medix Account – Healthcare Domain

Duration	Sep 2024 – Nov 2025
Role	Technical Lead
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, Angular, React JS, AWS, PostgreSQL
Client	Internal (T Medix Account – Health Care Domain)

Led the development team with expertise in both front-end and back-end Java technologies. Responsibilities include code review, sprint planning, feature design and implementation by collaborating with product and business teams. Developed Java and Node-based web apps ensuring high performance. Implemented event-driven pub/sub systems. Performed code quality and vulnerability assessments. Designed PoC for new features using machine learning models and AI for anomaly detection.

Roles & Responsibilities:

- Identify delivery bottlenecks and inefficiencies in the API development lifecycle.
- Coach developers on industry-standard best practices for API design, testing, and deployment.
- Introduce tooling, patterns, and accelerators (e.g., code templates, automation scripts, API governance practices).

Requirement Gathering & Design:

- Collect and translate business requirements into clear detailed designs.
- Design robust, scalable, and reusable APIs and integration patterns (REST, GraphQL, event-driven architecture).

Hands-On Leadership:

- Contribute to code reviews, proofs of concept, and development where necessary.

- Provide deep technical mentorship to uplift team capabilities.

Quality & Governance:

- Promote API versioning, documentation standards (OpenAPI/Swagger), and security practices (OAuth, rate limiting).
- Help establish or improve automated quality gates, testing, and CI/CD workflows for APIs.

Cognizant Technology Services, Pune (Aug 2022 – May 2024)

Walmart Account – Account Payable (Aug 2023 – May 2024)

Duration	Aug 2023 – May 2024
Role	Software Engineer
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, Angular JS, DB2, PostgreSQL
Client	Walmart Seller Central User, Third-party Business Partner, Customer

- Design and Development: Develop and maintain robust and scalable back-end applications using Java.
- Leading the dev team, code review, planning, sprint planning.
- Feature design and implementation by collaborating with Product & Business teams.
- Developing Java and node-based web apps from scratch, ensuring high performance and scalability. UI development with Angular 16, bug fixes and minor screens.
- Event-driven system using pub/sub to cascade updates of metadata to other modules.
- Code quality and vulnerability assessment and fixes.
- Database Management: Design, implement, and optimize SQL databases for efficient data storage and retrieval.
- Integration: Develop and manage data pipelines using Kafka for real-time data processing.

API Development: Design, develop, and maintain RESTful APIs to enable seamless interaction between system components.

- Microservices: Design and implement microservices architecture to improve scalability and maintainability.
- Containerization: Employ Kubernetes for container orchestration to manage deployment, scaling, and operations.
- Cloud Services: Utilize cloud platforms such as AWS, Azure, or GCP for deploying and managing applications.
- Testing: Conduct unit testing and integration testing to ensure code quality and reliability.
- Performance Optimization: Identify bottlenecks and optimize performance across the system.
- Mentorship: Mentor junior engineers and contribute to continuous improvement of team skills and processes.
- Build and maintain backend software services integrating Walmart-owned systems and 3rd-party software.
- Develop and maintain APIs and asynchronous messages allowing 3rd-party software to consume and produce events.
- Work on REST APIs, Serverless, and event-driven microservices.
- Utilize Spring Boot to design and implement low-latency REST APIs with Azure SQL Server and Cassandra as storage systems.
- Create and deploy large-scale containerized applications using Docker and Kubernetes in public clouds (GCP, Azure).

Chubb – Evolution Australia Support (Sep 2022 – Aug 2023)

Duration	Sep 2022 – Aug 2023
Role	Software Engineer
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, Angular JS
Client	US Based Subgroup – Chubb Corporation Evolution

In 2017, Chubb created a new policy administration platform called Evolution for Australia. This platform caters to the personal lines business HNI segment – Masterpiece and Home & Contents products for high net-worth clients in Australia.

- Monitor production Java applications, analyze incidents & resolve within SLA. Handle P1/P2 critical issues and provide RCA.
- Java Backend Issue Fixing: Debug Spring Boot/core Java code. Fix: Null Pointer Exceptions, memory leaks, thread issues, API failures (4XX/5XX). Tools: Splunk, ELK Stack.
- Microservice Support: Check service-to-service communication failures, validate Kafka consumer lag, monitor API gateway issues, restart pods (Kubernetes/Docker).
- Database & Data Fixes: Run SQL queries for investigation, validate policy/claims data, fix data inconsistencies, performance tuning. Database: Oracle/MySQL.
- CI/CD & Deployment Support: Support release deployments, fix build failures, rollback on production issues. Tools: Jenkins & Git.
- Minor Enhancements: Implement small business changes, add new API fields, modify validation logic, improve performance.

- Insurance Domain: Policy issuance, claims workflow support, underwriting data validation, premium calculation logic, regulatory compliance checks.

Tata Consultancy Services, Mumbai (Jan 2021 – Aug 2022)

Clinical Trials – CCT Portal (March 2022 – Aug 2022)

Duration	March 2022 – Aug 2022
Role	Software Developer
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, Angular JS, PostgreSQL, MongoDB
Client	Stakeholders, Research Focus, Sponsor

TCS ADD Connected Clinical Trials (Life Science Domain). Developed Java, Spring Boot and microservices-based system for patient medication and appointment. Utilized Agile Development with Jenkins, Maven, GIT, Postman. Database: PostgreSQL and MongoDB.

- Develop user interfaces using the AngularJS framework.
- Create high-performing, responsive, and interactive web applications. Unit-test the code and debug the application.
- Played a crucial role in interactions with Germany and US-based customers, proactively resolving production issues. Led a team of trainees.

Priceline (Aug 2021 – March 2022)

Duration	Aug 2021 – March 2022
Role	Software Developer
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, React JS
Client	Priceline

Priceline.com is an online travel agency for discount rates on airline tickets and hotel stays. It operates in more than 200 countries with partnerships with over 400 airlines and 300,000 hotels.

- Develop and maintain Priceline's web application (React JS / Angular + Spring Boot).
  - Build and optimize microservices for booking, payments, and user management.
  - Integrate APIs for flights, hotels, and rental car services.
  - Ensure performance and scalability using Kafka, caching (Redis), and NoSQL databases.
  - Implement security features: JWT, OAuth, Spring Security.
  - Deploy and manage services in Kubernetes and cloud environments. Debug and troubleshoot production issues.
  - Work with relational and NoSQL (MongoDB, Cassandra) databases; efficient data access, indexing and caching strategies.
  - Deploy and scale applications in Azure cloud; Docker/Kubernetes containerization; CI/CD Pipelines (Jenkins, GitHub Actions).
  - Implement Spring Security, OAuth, JWT for authentication/authorization. Work in Agile/Scrum teams.

Tata Consultancy Services – GE Digital (Jan 2021 – Aug 2021)

GE Support Central USA

Duration	Jan 2021 – Aug 2021
Role	Software Developer
Location	Pune
OS	Windows, Linux
Environment	Java (1.7, 1.8, 17), Maven, Hibernate, Spring MVC, Spring Boot, Microservices, Apache Kafka, RESTful API, GitHub, Docker, Kubernetes, Azure SQL Studio, React JS, PostgreSQL
Client	GE Digital

GE Digital provides industrial software and services across manufacturing, electric & telecommunications utilities, oil & gas, and power generation markets.

- Leading team, requirement gathering & Agile sprint effort estimation.

- Spring Boot, Hibernate, JPA, RabbitMQ, CI/CD, GIT, Jenkins, Azure DevOps, Docker, Azure Cache for Redis, Azure Service Bus, Spring Cloud, React JS, Angular.
- Working on GE Support Central NextGen applications development & enhancements with microservices design pattern.
- SAST/DAST scan security checks for all microservices.
- Optimized application code & DB queries, implemented caching to improve overall system efficiency – $1.2M monetary savings.
- Design and development of backend solutions and new product features.
- Conducted code reviews and provided constructive feedback to team members.
- Converting legacy monolithic applications into microservices.

Meteor Softech Pvt. Ltd, Pune (July 2017 – Nov 2020)

Capital Finance (Oct 2019 – Nov 2020)

Role	Software Developer
Environment	Java, J2EE, JSP, Hibernate, Spring Boot, Spring RESTful Web Services, AJAX, MySQL
IDE / Server	Eclipse / Apache Tomcat
Description	Manage loan lifecycle across Sales, Credits, Legal, Technical, Disbursement and Admin departments until cheque disbursement. Includes document upload and verification.

- Understanding user cases and translating them into functional requirements.
- Responsible for coding and developing using Spring MVC, JSP.
- Writing Hibernate mapping files and maintaining database.
- Developing fixes, enhancements, and new features for existing Java applications.

Employee Assessment (Sep 2018 – Oct 2019)

Role	Software Developer
Environment	Java, JSP, Hibernate, Spring MVC, JavaScript, AJAX, MySQL
IDE / Server	Eclipse / Apache Tomcat
Description	Employment Assessment ensures alignment between the employee selection process and desired business outcomes such as higher retention, increased sales, and higher customer satisfaction.

- Understanding user cases and translating them into functional requirements.
- Responsible for coding and developing using Spring MVC, JSP.
- Writing Hibernate mapping files and maintaining database.

My Connect (Jul 2017 – Aug 2018)

Role	Software Developer
Environment	Java, JSP, JavaScript, AJAX, Hibernate, Spring MVC, Spring Boot, MySQL
IDE / Server	Eclipse / Apache Tomcat
Description	Developed for managing and maintaining records of employees: salary, attendance, leave management, etc.

- Responsible for coding and developing using Spring MVC, JSP; Designing Controller, Service and DAO specific Java Classes.
- Develop, test, and maintain Java-based applications. Write clean, efficient, and reusable Java code.
- Design and implement RESTful APIs and microservices.
- Collaborate with front-end developers, UX/UI designers, and product teams.
